MY LIST OF CHOICE FLOWER SEEDS

1914

WHY YOU SHOULD PATRONIZE ME

1. My seeds are fresh and of the best grown.
 2. I have only reliable kinds and such novelties as have established value.
 3. All mixtures are made by myself from named varieties only.
 4. My packet prices are less than the usual rates, allowing a larger assortment for the same outlay.
 5. All orders for seeds are filled with the utmost promptness.
 6. I am a real, live woman and give personal attention to my business.
- Miss Emma V. White, 3010 Aldrich Ave., S., Minneapolis, Minn.

MY THREE WARRANTS

1. I Warrant Your Remittance to Reach Me if sent by either postoffice or express money order, bank draft or registered letter but by no other method. You may select extra flower seeds in packets to the amount of the cost of sending money by any one of these methods. If you remit by stamps or silver, it will be at your risk. If stamps are sent use one or two-cent stamps, and do not stick them to your letter. It is comparatively safe to send small amounts of silver, but it should never be put loose in the envelope. Sew it between pieces of blotting paper or cloth.

2. I Warrant My Seeds to Reach You, provided I receive your order. If you do not receive them promptly, please notify me not later than two weeks after the date you sent your order, and give date and enclose duplicate, of which you should always retain a copy. You should receive your seeds within two or three days of the actual time it takes the mail to come and go between the two points, as I aim to fill all orders within twenty-four hours of their receipt (except plant and bulb orders. See pages 46 and 51 in regard to bulb and plant deliveries).

Promptness is my motto: Try me. If you do not get your seeds it is from one of the following reasons:

Why You Do Not Receive Your Seeds.

- a. No address given. I receive many orders without signature or postoffice. Be sure to sign your name and give name of office.
- b. Insufficient address. If there is mail delivery do not fail to give street or rural delivery number.
- c. Indistinct writing. Take special pains to write name and postoffice distinctly.
- d. No title given. Ladies should always give title, Miss or Mrs., especially if initials only are signed.
- e. Fault in Postal Service. Sometimes letters fail to reach me, and sometimes packages, even when properly addressed, are lost or mis-carried in the mails.

3. I Warrant My Seeds to be Good.

No one can promise that seeds will grow, nor do I, as so much depends on conditions. I know by actual testing that my seeds are good, but if any failed to grow for you last year and you think that the failure is due to lack of vitality in seeds and not to some other cause, you may feel at liberty when placing your order with me this year to include such varieties. Seeds of Greenhouse Plants, which generally require special care, are excepted from this offer to replace. A new order should accompany application for seed to be replaced, and please refer to date or number of last spring's order in which it was included.

LIBERAL PREMIUMS

Take Notice—Extra packets of seeds will be allowed on every purchase of seeds, plants or bulbs from my catalog (except Lawn Grass seed, on which prices are net), but the selection must invariably accompany the order. Orders sent at different times cannot be taken together to entitle one to a premium. See opposite page for particulars.

Free; My "Culture of Vegetables"

A carefully prepared booklet on growing vegetable seeds will be given free with every order for vegetable seeds amounting to 10 cents or over.

My "Culture of Flowers"

Price, 5 cents, or Free with Orders of 25 cents or Over.

It is not enough to sow seed. It must be done right and under proper conditions. My booklet tells you how to do it. It is practical, not technical; for the amateur, not the professional; and even the least skillful can understand and follow its simple yet comprehensive directions. To cover part of the cost, I make a nominal charge of 5 cents. Free, if asked for, however, with any order of 25c or over.

Cortland, N. Y. July 13.—I have been your customer three years, and as I won two first prizes at our Fair you will not wonder that I am enthusiastic over them. From one packet of Sweet Williams I have every imaginable color, and my Canterbury Bells, in every shade of blue pink and white, cannot bear up their own weight of bloom. Mrs. Lottie Babcock.

Cheat Haven, Pa. Mar. 13.—"I have been your customer ten years and am well pleased. I have 11 colors of Primroses and they certainly are pretty." Mrs. N. J. Arnold."

Smith's Creek, Mich., Mar. 13.—"I have used your seed 3 years. Pansies and Asters were grand and at present Cinerarias are beautiful." Mrs. C. C. Brock.

CINNAMON VINE BULBS

Beautiful leaves, dainty flowers, exquisite perfume, grows in shade or sun, wet or dry. No insects ever trouble. No winter harms.

A charming climber that will quickly surround your arbor, window or veranda with a wonderful profusion of vines covered with handsome, glossy, heart-shaped leaves, while its clusters of delicate white flowers emit a delicious fragrance. **VERY HARDY**, thriving almost everywhere, though perhaps not so well adapted to the extreme north. The first year the vines run about 10 feet, but eventually reach a height of 25 to 40 feet. See my "Culture of Flowers" for directions. Two or three roots, one foot apart, on each side of a door or window will quickly cover it. They do best in a warm, sunny location, though thriving anywhere.

EXTRA QUALITY—Sure to Grow. Price, 1 strong root, 5c; 3 roots, 12c; 6 roots, 21c; 12 roots, 40c; all postpaid.

Some Choice New Things You Will Want to Try

AFRICAN DAISY HYBRIDS (*Dimorphotheca Aurantiaca Hybrida*). The African orange daisy has become a "must-have" in most gardens and these variations will be equally popular. They come in shades of yellow from golden to sulphur and orange to salmon, in pure white, and white with a reddish or bluish tinge, and many are ringed or zoned. Easily grown from seed. Plants like a rather dry, sunny position. Pkt., 30 seeds, 6c.

BIDENS DAHLIODES. Flower lovers will like this as it adds to the list of annuals for cut flowers. It forms a dwarf bush, bearing profusely all summer large daisy-like pink flowers, resembling Cosmos; splendid for cutting. Start inside in March or April and plant out later in a sunny location. Pkt., 15 seeds, 10c.

CARDINAL CLIMBER. The best climber introduced in years. See p. 19.

ORNAMENTAL BEET. Something new for bedding. Takes the place of Coleus, or other foliage plants. See p. 19.

SUMMER FIR (*Artemesia Sacorum*). A most interesting novelty! Will produce a hedge the first summer! A new annual ornamental foliage plant from China. It forms a symmetrical pyramidal bush, 3- to 5 feet, similar to a Christmas tree, with finely cut

dark green foliage. Equally valuable as single specimens, in groups, or as a hedge, and does well in the poorest soil. Pkt., 6c.

WHITE STOKESIA. A magnificent white variety of *Stokesia Cyanea*, or Cornflower Aster. Flowers especially apt for cutting. Pkt., 20 seeds, 6c.

WINTER BLOOMING WALLFLOWER (*Cheiranthus Kewensis*). Splendid for the winter window garden, or for outside in the warm sections, blooming from November to May, with deliciously sweet-scented flowers in purple-violet or sulphur to golden yellow. Pkt., 30 seeds, 6c.

Burlington, Ia., Mar., '18.—“I want to tell you of my success with your Aster seeds. I had one bed 20 ft. by 60 ft. It was one of the most beautiful things anyone would wish to see. People came from all over the city to see them and one of our daily papers had a write-up about my flower garden. Your Sweet Pea seeds were good. I like the Spencers the best. I have always found your seeds just what you advertised and do not think there could be any better found.”

Harry J. Robbins, Burlington, Iowa.

ASTERMUMS

Immense flowers, full to the center,—a splendid new type of the Comet, or Ostrich Plume Aster, introduced after eight years of painstaking selection. The originator says, “The three colors are unsurpassed. The lavender has never before been produced, the pink is the beautiful pink of the rose and the white as white as the driven snow.” Owing to their sturdy, upright habit the plants need be set only nine inches apart.

Price of each, Pkt., 50 seeds, 7c; 2 pkts., 12c.

Lavender Asterum White Asterum
Pink Asterum Mixed Asterumms

VICK'S KING ASTERS

A distinct class, the long narrow petals having somewhat the appearance of being quilled. The flowers are very large and full and last longer when cut than any other sort. Violet King was the first one developed and has been so much in demand as to become a standard. New colors are now offered and the word, “King,” has become the name of the class. Rose King and White King are especially desirable. Note my four varieties. All are late-flowering and in character like the illustration of White King.

Price of each, Pkt., 75 seeds, 6c; 2 pkts., 10c.

Pink King. Lavender-pink.

Rose King. Deep bright rose.

Violet King. Rich Violet purple.

White King. Petals are not so much folded as in Violet King, giving the flower a softer appearance. See illustration.

King Asters Mixed. The above four varieties mixed.

Cicero, N. Y., Jan. '13—“A lady here had Asters from you last year and they were the finest I ever saw. I have always bought of one of our New York firms, but want to get seed of you this year for exhibiting at fairs.”—Mrs. Grace A. McCulloch.

SUPERBA COMET ASTER

The Biggest Yet

Those who have visited the city of Rochester, N. Y., know what a beautiful aster Vick's Mikado Rochester is, it being that city's official flower. The Superba may be called an improved Rochester, being of the same type and beautiful lavender-pink color, tho a shade darker, but it is a much larger and heavier flower. In fact, it was pronounced by several professional florists who saw it growing the past summer to be the largest Aster they ever saw, hundreds of blooms measuring six inches and over. It is simply immense, like a great Chrysanthemum. I am glad to be able to offer it to my patrons. Pkt., 50 seeds, 7c; 2 pkts., 12c.

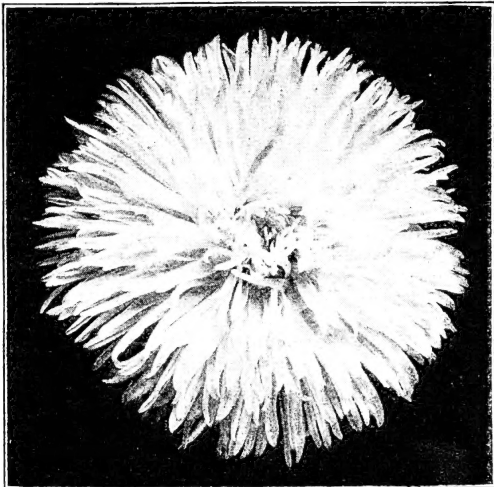

WILHELMINA ASTER

A New Red Aster

This is a long bloomer of the late-branching type, and my grower thinks it the best bedding Aster he has ever seen and says it is the nearest to a true scarlet. The buds are rosy carmine, changing to a beautiful dark velvety scarlet in the fully open flower, and it is by far the best red Aster for bedding purposes ever introduced. Pkt., 50 seeds, 6c; 2 pkts., 10c.

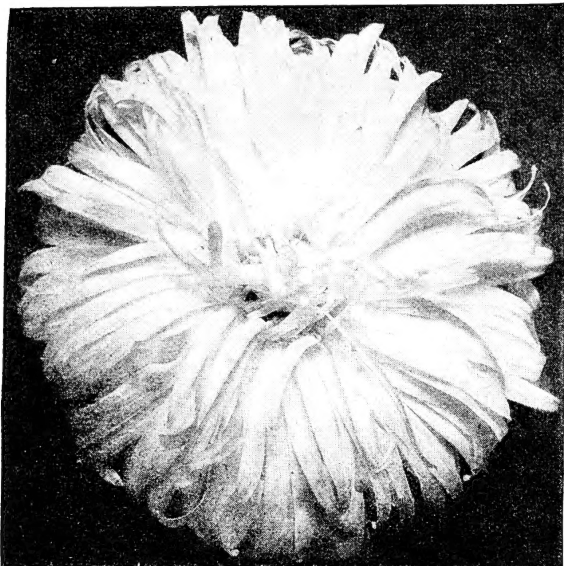

ROYAL STRIPE COMET ASTER

The comet is almost the only class in which stripes and variegated forms appear. This mixture that I call **Royal Stripe** contains not only some beautiful striped asters, blue or rose on white ground, but a number of other novel and delicate variegated sorts, such as rose or blue with white center, and others, white passing to amethyst or pink, --truly dainty and beautiful forms. Pkt., 75 seeds, 6c; 2 pkts., 10c.

MID-SEASON ASTERS

Comet Aster

GIANT COMET ASTER

With all the new forms of this type, and no doubt many improvements have been made, the comet still holds its place in popular favor and it should not be omitted from a representative list.

Price of each, Pkt., 125 seeds, 5c; 2 pkts., 8c.

Crimson	Rose
Dark Blue	Shrimp Pink
Lavender	White
Light Pink	Mixed

Collection of Comet Asters. One-half pkt. of each of the named sorts; 7c half pkts., for 20c.

CREGO ASTER

A splendid new Aster, pronounced by many the best Comet strain. The blossoms measure 4 to 5 inches, their graceful chrysanthemum effect being heightened by the much twisted petals. See cut of Asterum, page 5, for illustration of this type.

Price of each, Pkt., 100 seeds, 6c; 2 pkts., 10c.

Purple	Shell-Pink
Rose-pink	White
	Crego Mixed

VICK'S LAVENDER GEM

The best lavender Aster, being of finest Comet form and excelling all other lavender asters in its delicate shade. It is especially valuable to commercial growers. Pkt., 75 seeds, 6c; 2 pkts., 10c.

DREER'S WHITE FLEECE

One of the largest and most perfect asters of Comet form, bearing immense flowers 5 inches across, beautiful globes of fleecy white. Pkt., 75 seeds, 6c; 2 pkts., 10c.

LADY ROOSEVELT ASTER

This is an exceedingly mammoth Aster and is one of the most satisfactory ever produced. It is a rampant grower, producing immense flowers, 5 to 6 inches in diameter. The long, broad petals are curled, giving the appearance of a graceful chrysanthemum; color a deep rose-pink. While it properly belongs to the Invincibles (see cut on page 7) it blooms so much earlier that it may more properly be classed with the Mid-season Asters. Pkt., 75 seeds 6c; 2 pkts., 10c.

VICK'S EARLY BRANCHING

These are not of the Comet style, but belong to the branching class, and have all the beauty and vigor of the late-branching sorts, but they have also a decided advantage in coming from 10 days to two weeks earlier. They should be in your garden if you wish continuous bloom from the earliest flowering down to the gorgeous late bloomers.

Price of each, Pkt., 100 seeds 6c; 2 pkts., 10c.

Rose-pink	Mixed

ASTER LEAFLET

Free with an order of 10c or over. Gives cultural directions and tells you all about the aster troubles.

New Haven, Ct.--"I took 1st prize on Collection of Asters at our Horticultural Exhibition--all from you."--Frank Sheldon.

VICK'S ROYAL PURPLE

One of the best purples grown. In form it belongs to the branching class, but is mid-season as to time of blooming. Blossoms are large and perfect to the center; color bright purple. Pkt., 100 seeds, 5c; 2 pkts., 8c.

VICK'S MIKADO ASTER

The Mikados and Cregos are very similar and may well be placed at the head of the Comet class. They produce immense, fluffy flowers, like great Chrysanthemums, borne on long, stiff stems, splendid for cutting. I offer three shades, including the much-lauded Rochester, the official flower of the city of Rochester, a lovely shell or lavender-pink. The cut of Asterum, page 5, gives a good idea of the Mikado form.

Price of each, pkt., 75 seeds, 6c; 2 pkts., 10c.

MISCELLANEOUS ASTERS

Dwarf Aster Mixed. Pretty to edge a bed or grow in pots. They bloom profusely, forming a little mound of flowers, almost hiding the foliage. Mixed--all double, in many colors. Pkt., 125 seeds, 5c.

Yellow Aster. No decided yellow has been developed in the large Aster. This is of medium size, has quilled petals and is the best yellow offered. Pkt., 125 seeds, 5c.

Crown Aster. An attractive variety, bearing great numbers of densely double flowers, each with a white center and wide margin of some brilliant color. Mixed. Pkt., 125 seeds, 5c.

LATE FLOWERING ASTERS—BRANCHING TYPE

*Handsomest of all Asters and
Best for Cutting*

LATE INTRODUCTIONS

Peerless Pink Aster

Introduced by Dreer, and said by experts to be the best shell-pink of its type. It is a cross between the pink Crego and late-branching shell-pink, but is more closely related to the latter class in form, color and season of flowering. They bear immense flowers, 4 and 5 inches across, a beautiful rose, or shell-pink in color, similar to the cut of Invincible. Pkt., 75 seeds, 6c; 2 pkts., 10c.

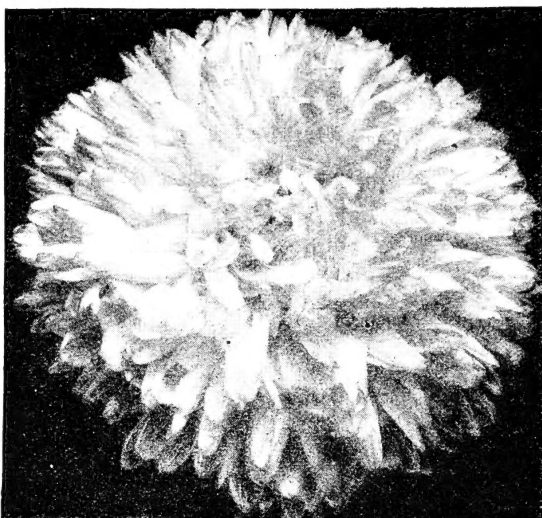

Crimson King Aster

Another of Dreer's Asters, dark blood crimson, remarkable perfection of form and appearance, the flowers frequently measuring 5 inches across. Pkt., 75 seeds, 6c; 2 pkts., 10c.

Vick's Cardinal Aster

A dark red Aster splendid for bedding, making a brilliant show from early August till the close of the season. Pkt., 100 seeds, 5c; 2 pkts., 8c.

Watertown, N. Y., Sept. '12---"A few words of praise for the Aster Collection you sent me last winter. I cannot begin to tell you of their beauty and the largeness of the flowers. They are simply a sight and have been admired by hundreds of people."
---David Downie.

Coming late, they greatly prolong the Aster season. Use this strain with Queen of the Market and the Comet types and have a succession of the most beautiful Asters from mid-summer to latest frosts.

EARLY FLOWERING AND MID-SEASON—COMPACT TYPE

**IMPERIAL DAYBREAK ASTER**

These are improved successors to the long popular and well-known Victoria or Washington Asters. The above illustration is a good type of all the Daybreaks and well shows their profuse flowering habit. The blossoms are very double and compact, and have always been a favorite with florists, both because of their medium early flowering and for their own peculiar beauty. My list includes all the late introductions in this class, most of which have been put on the market by Vick, and to which he gives the general name of Imperial.

Price of each, pkt., 75 seeds, 6c; 2 pkts., 10c.

Daybreak. First in the field. Blossoms are large and full, on long strong stems; color a light, sea-shell pink.

Lavender Daybreak. Identical with Daybreak in form and habit, but in color a delicate lavender.

Purity. Pure white; splendid for bouquets or design work.

Salmon Daybreak. A beautiful new shade of salmon pink, a handsome Aster.

Vick's Sunset. An exceedingly beautiful shade of light pink, shading to a darker pink in the center. Greatly admired.

IMPERIAL DAYBREAK MIXED

The above five sorts mixed, together with scarlet, crimson and dark blue shades of Victoria, to make a well balanced mixture. A chance to try all the above new Asters. Pkt., 100 seeds, 6c; 2 pkts., 10c.

Daybreak Collection. 6 pkts., ½ pkt., of each of the 6 sorts, for 20c.

ASTER ADVICE

What Varieties Shall I Buy? For early, Queen of the Market; for mid-season Daybreak, Comet, Crego, Mikado, the last three preferred; for late, Semples and Invincible types; both are fine.

Almost all the Novelties are variations of the above varieties. I offer the best of the recent novelties, using the name of the introducer, both because mine are grown from their strains and because of the nation-wide reputation their advertising has given them.

Don't be Afraid of my Low Prices. You can pay more for Aster seed if you want to, but you won't get anything better. My price is low, not because of low grade, but of my custom to lessen the size of the packet, thus giving a larger selection for the same outlay.

"Most Perfect Asters Grown." My seed is raised by an expert and careful grower, who grows also for several of the large Eastern seedhouses. Read the following from one of my patrons: "I really had better success with your Aster seed than with that from a prominent Eastern firm."

QUEEN OF THE MARKET

If you want Asters at the earliest possible date this should be in your purchase, especially if you grow commercially, as the earliest blooms always bring the best prices. It comes from 2 to 4 weeks earlier than any other sort and is besides a handsome flower.

Price of each, pkt., 125 seeds, 5c; 2 pkts., 8c.

BEST TWENTY-FIVE GRANDIFLORA SWEET PEAS

The Grandiflora Sweet Peas (the old standard sorts) do not get so much advertising nowadays as do the Spencers, but they are indeed wonderfully fine, and one need not buy the expensive Spencers in order to have the best results, either as to quality or quantity of bloom. In fact one of the finest displays of Sweet Peas I ever saw was a hundred-foot row grown by one of my Montana patrons from my "Best Grandiflora varieties." There was a great wealth of the richest colors imaginable, and certainly there could be nothing more beautiful,—not even the newest and highest-priced Spencers. It is well known that the Grandifloras are better germinators and more prolific bloomers, and the time is far off when they will be superseded by the Spencers. In the following list, I offer the cream of this type, such as Sweet Pea lovers cannot afford to be without.

Price of any sort on this page, pkt., 80 seeds, 5c; any three pkts., 12c; any ten pkts., 35c; 1-2 oz., 7c; 1 oz., 12c; any two oz., 20c; any four oz., 35c.

SWEET PEA MIXTURES

BEST GRANDIFLORA VARIETIES, MIXED

This is my choicest mixture of Sweet Peas and cannot be surpassed in variety or richness of color, or size and substance of bloom. I make it myself and include in it not only the 25 varieties described on page 12—a proved list of standard sorts, the very best in cultivation today—but a number of other named varieties and also a large percentage of the popular new wavy Spencer and Union types, thus making it thoroughly up to date. From several years' experience and from innumerable complimentary expressions from my customers, I know that the variety and proportion of colors are highly satisfactory, and I offer this in full confidence that it cannot be excelled by any other sweet pea mixture on the market. Pkt., 90 seeds, 5c; oz., 10c; 2 oz., 15c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 50c; 1 lb., 80c.

GIANT CALIFORNIA SWEET PEAS, MIXED

A very choice mixture of only large-flowering types containing a large proportion of light colors with enough dark for a contrast. This includes also what I have left over from my choice named varieties. Every one knows that Sweet Pea seed retains its vitality for several years, so this is practically as good as if all were fresh seed. Having quite a surplus I can offer this splendid mixture at a very low price. Pkt., 100 seeds, 4c; oz., 8c; $\frac{1}{4}$ lb., 22c; $\frac{1}{2}$ lb., 35c; 1 lb., 60c.

WINTER FLOWERING, OR CHRISTMAS SWEET PEA

These are the earliest-flowering sorts, usually blooming in about twelve weeks from sowing. They are called "Christmas" Sweet Peas because used by florists for forcing in their greenhouses, furnishing bloom for Thanksgiving and Christmas from seed sown about Sept. 1. They are just as suitable for open ground culture, however, and every one should have at least a short row and thus get flowers from three to four weeks earlier than from the standard sorts, and also greatly prolong the Sweet Pea season. All who grow for commercial purposes will find them of distinct advantage. The plants which begin to bloom when about a foot high and never attain a height of more than 3 or 4 feet are often grown without support. Price, pkt., 75 seeds, 7c; any 3 packets, 15c; $\frac{1}{2}$ oz., 13c; oz., 20c; $\frac{1}{4}$ lb., 65c.

Christmas White or Denzer's White. Pure white and very early.

Earliest of All or Christmas Pink. White wings, with bright pink standards, like the Blanche Ferry, or the old "Painted Lady." Seed is carefully selected from the earliest flowering stock only and is especially recommended.

Earliest White. A black-seeded, very early white.

Mrs. Alexander Wallace. Pinkish lavender.

Mrs. J. F. Dolansky. Light pink.

Christmas-Flowering Mixed, including all the above and other new sorts, giving all the shades yet developed in these remarkably early kinds.

Early Minnesota Cosmos

EARLY FLOWERING COSMOS.

There is nothing handsomer than the Cosmos, but its late flowering has prevented its universal cultivation. Growers have been experimenting, however, and now the offerings of early-flowering varieties rival their fall sisters. I call especial attention to my new, specially early strain of Minnesota-grown seed, which all flower lovers will welcome.

Early Minnesota Cosmos. A valuable new strain of Minnesota-grown seed. It was in blossom here this year as early as July 3, and was still blooming profusely Oct. 21, when cut off by frost. Constant cutting makes no difference in the decorative effect of the row. Mixed pkt., 50 seeds, 7c.

Early Dawn Cosmos. Flowers pure white, with a tinge of rose at the center. Plants begin to bloom about August 1. Pkt., 50 seeds, 5c.

Early Pink and Early Red. Separate, each per pkt., 50 seeds, 5c.

Early Flowering Cosmos, Good Mixed. Splendid pink, red and white shades mixed. Pkt., 50 seeds, 5c.

Duluth, Minn., Apr., '13.—"I had the most beautiful Cosmos in the city. I planted Malloys on the outside and Cosmos inside against the fence. The combination was most attractive."—Mrs. F. G. Patton.

SOWING PERENNIAL SEED

1. Sow in spring, from April 15 to June 15, according to latitude—not till settled warm weather.
2. From July 15 to September 15, which gives the young seedlings enough growth to stand the winter.
3. Late, shortly before freezing weather, letting seeds lie in ground to come up early in spring.

Pottibone, N. D.---"I want to tell you how lovely my Early Minn. Cosmos is. Have never before succeeded in getting Cosmos to bloom."---Mrs. Hattie C. Barry.

PASSION FLOWER (Australian Fruiting)

One of the prettiest of climbing plants for the window or outside trellis, climbing to a height of 20 feet or more. The flowers are both curious and beautiful, and very fragrant, and borne in great abundance. The seed pods, too, are highly ornamental as they burst open and disclose their bright scarlet seeds. Pkt., 12 seeds, 6c.

PEONY

One of the most satisfactory perennials. The seed is slow in germinating, and the plants do not bloom until the second or third year, but once established they pay for the long waiting, and one often gets new and valuable varieties from the seedlings. Fresh seed sown in the fall will come up the following spring. Mixed. Pkt., 15 seeds, 6c; $\frac{1}{4}$ oz., 15c.

OENOTHERA, Evening Primrose

My patch of *Oenothera* was as showy a thing as I had in my garden. The large, saucer-shaped flowers open towards evening and emit a delightful perfume. "BABY" ROSE

Rosa Polyantha Multiflora Nana, or "Little Midget" or Baby Rose, is a charming hardy little plant about 10 inches high, bearing clusters of minute roses only an inch across, double, semi-double, or some times single. The many-flowered clusters look like a mass of double crab-apple blossoms. I have taken pains to secure the best seeds and true to name. Not all the *Rosa Polyantha* seed is of this dwarf, early-flowering variety. It blooms the first season, though not attaining perfection until the second year. Pkt., 30 seeds, 6c.

PETUNIA

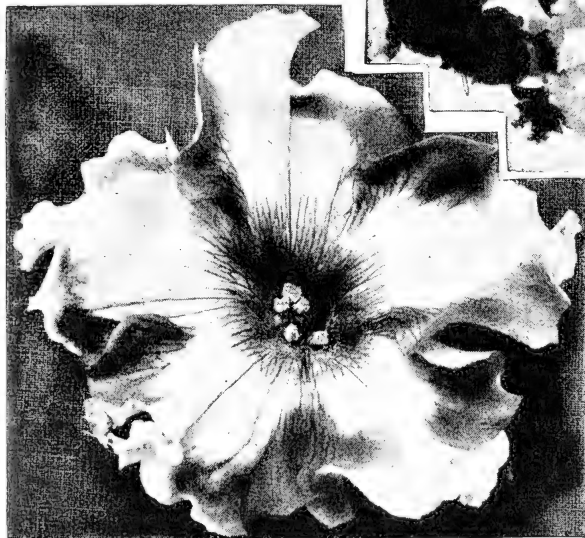

GIANTS OF CALIFORNIA

Single Mixed

This mixture will give as handsome Petunias as any on the market. Some will measure four or five inches across, the corollas being ruffled, fluted or fringed, with extremely deep and large open throats. Double
Petunia

Giants of California, Single

GIANTS OF CALIFORNIA, Double Mixed

I have taken utmost pains to secure the very best strains of Double Petunias, and in order to offer my patrons the handsomest varieties have mixed the strains of three expert growers, who have devoted years to the development of these large-flowering fancy Petunias. Not all come double, but the seed will give a good percentage of deeply fringed, double flowers, in the brightest colors and most beautiful tints. Those that come single will be of choice varieties. The flowers in the cut above were from one of my growers. Pkt., 50 seeds, 12c; 2 pkts., 20c.

Double White Petunias

Anaheim, Cal.—"I have had the pleasure of using your seeds the past 4 years."
—Mrs. J. E. Fisher.

BEDDING PETUNIAS

Petunias are often considered too common to grow, but one of the prettiest floral sights of the past summer was a boulevard, skirting the street the length of a city lot, massed with Petunias from my Special Mixed strain. The newer kinds are so pretty one cannot afford to miss the brilliant display a small outlay will furnish.

Petunia, Blotched and Striped.

Beautifully striped and mottled, including Howard's Star, the handsomest starred variety. Exceptionally fine for massing, baskets or vases. Pkt., 400 seeds, 5c; 2 pkts., 8c; 1-8 oz., 15c.

"Dwarf Inimitable." Compact plants covered throughout the season with richly self-colored, starred and mottled flowers; best for bedding. Pkt., 400 seeds, 5c; 2 pkts., 8c; 1-16 oz., 10c.

Badona, Minn., Oct. '13.—"I tried four seed houses for double Petunia but did not succeed in getting any; but this year from your seed mine are nearly all double. One was a great surprise, being a bright rose-pink."
—Mrs. John Hesselgrave.

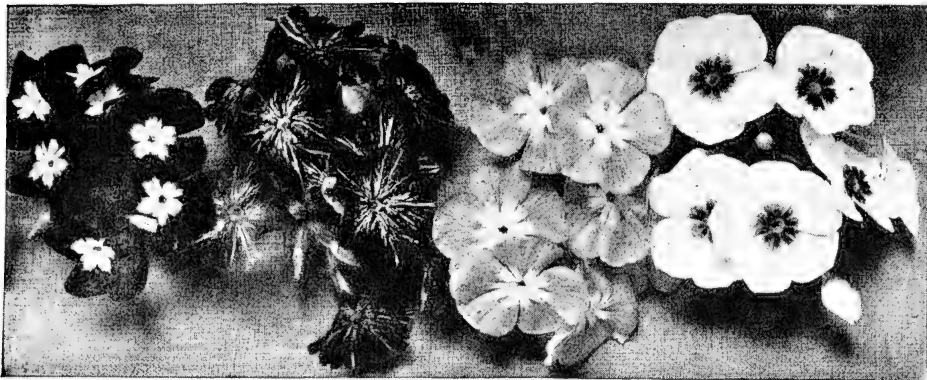

Petunia Rosy Morn. Splendid for bedding, potting or edgings. The little plant is covered with myriads of delicate pink flowers throughout the season. By far the handsomest named variety and a decided rose-pink. Pkt., 300 seeds, 5c; 2 pkts., 8c.

Don't waste space on the homely faded out magenta shades when a few cents will give you some of the newest and choicest hybrid varieties. Sow seeds in the ground in the fall, or in winter in a shallow box (with good drainage) and set it on the north side of the house to freeze and thaw. The seeds will come up in the spring. Finest mixed, 2 to 3 feet. Pkt., 40 seeds, 7c.

PERILLA NANKINENSIS.

A tall growing decorative plant, with purplish mulberry-colored foliage, pretty to mass with silver or green-leaved plants. Very pretty for the border where tall effects are desired, or to edge a bed of other tall growing plants. 2 feet. Pkt., 100 seeds, 4c.

PLATYCODON.

(Japanese Bell Flower)

A hardy perennial that blooms the first year, with showy large bell-shaped flowers, in blue or white. Will last longer as a cut flower than almost anything else. 2 to 3 feet.

Double and Single Mixed. The plants are covered for a long period with beautiful bell-shaped blossoms, forming highly ornamental little bushes. It is interesting, too, to watch the unfolding of the buds, which first appear like tiny puff balls. In the double sorts there will be two rows of petals, but not a large percentage will come double. Pkt., 200 seeds, 5c.

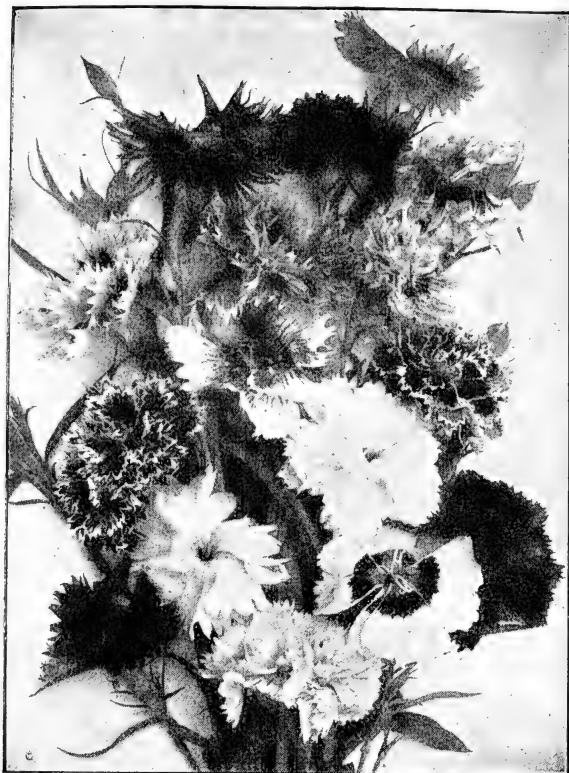

Dwarf Platycodon. Blossoms smaller and more bell-shaped. Bloom all summer. Pretty for an edging or for pots. 6 to 8 inches. Pkt., 200 seeds, 5c.

FOR WINTER BLOOMING.

An inexpensive window garden may be had from seeds of such annuals as the following, and as results come so much sooner than from seeds of the regular greenhouse plants it will be found very satisfactory:

Alyssum, Balm, Calendula, Candytuft, Larkspur, Lupine, Mignonette, Nasturtium, Nicotiana, Phlox, Portulaca, Snapdragon, Stocks, Winter-flowering Sweet Pea, Verbena, Wall-flower.

PENTSTEMON GRANDIFLORA

New large-flowered hybrids, in color varying from white, pink, rose and crimson to mauve and purple. In style of bloom they are very similar to the Foxglove, but they come later, thus prolonging the flowering season of this popular flower. If started early they bloom the first season. Hardy perennial, 2 ft. Pkt., 200 seeds, 6c.

SCARLET RUNNER

The bean known as Scarlet Runner is highly ornamental as well as useful, and both in foliage and flower is as pretty a climber as many of its more aristocratic neighbors. Pkt., 15 seeds, 5c; oz., 9c.

SENSITIVE PLANT

Cultivated for its curious habit of closing its leaves at the slightest touch. Children always enjoy it. Tender annual. Pkt., 40 seeds, 6c.

POPPIES

SHIRLEY POPPY

"Acme" Mixture

In an effort to offer the very best in this most popular poppy, I have tried the strains of several noted growers, and have prepared for this mixture a strain that cannot be excelled. Besides several choice mixed strains it contains seed from an English grower in fourteen named varieties, making this a mixture "par excellence." Nothing makes a more beautiful display, either in the garden or for decorating, than the Shirley Poppy. They range from pure white and delicate pinks to rich, gaudy hues,—all of so sheeny a lustre as to be called SILK, or Ghost Poppy. One of the prettiest table decorations I have seen was a dainty basket of Shirleys. If picked before the sunshine strikes them, and base of stems dipped in boiling water, they last two or three days. No better assortment than mine. Pkt., 400 seeds, 6c; $\frac{1}{2}$ oz., 15c.

COLLECTION OF SHIRLEY POPPIES

One-half packet each of the 14 named Shirley sorts referred to above. If you want a gorgeous color scheme and wish everything grown in Shirleys, try this collection. Fourteen half packets, 30c.

PERENNIAL POPPIES

Iceland Poppy. The shades range from pure white to deep orange scarlet, with petals beautifully crinkled like crushed satin. They come early and stay a long time. One of my customers used these for a table decoration in the early spring, with such effect that about every lady at the luncheon came to me afterward for seed. Pkt., 400 seeds, 5c; 1-16 oz., 10c.

New Iceland Hybrids. A charming dwarf strain, all under a foot high, producing elegant tufts of foliage, covered for months with flowers in many shades, including new combinations of color not before known in this group. Pkt., 300 seeds, 6c.

Oriental Poppy, A gorgeous flower for the perennial bed. It grows three to four feet high and bears immense scarlet blossoms, six to nine inches in diameter. Different shades of scarlet and orange, mixed. Pkt., 400 seeds, 5c; 1-16 oz., 10c.

Oriental Poppy, "Excelsior." A new and improved strain from an English grower, including all the new shades from the most delicate salmon pink to deep crimson. A grand mixture. Pkt., 300 seeds, 6c.

COLLECTION OF POPPIES

One full pkt., of each of my mixed sorts, Double, Single, Shirley, Iceland and Oriental, five pkts., for 15c.

GROUP OF DOUBLE POPPIES

DOUBLE POPPIES

Pkt., 500 seeds, 5c; 2 pkts., 8c; $\frac{1}{2}$ oz., 10c.

Japanese Poppy. Large, loosely double white flowers with deep border of brilliant scarlet, either solid or striped, and with petals fantastically cut and fringed. (See upper flower in illustration.) Three lovely sorts,—American Flag, Fairy Blush, and Mikado,—mixed.

Double Scarlet. Brilliant red.

White Swan. Pure white, fringed edges.

Double Mixed. Splendid mixture, containing the above three; also strains of Peony-flowered (see flower on the right), Carnation-flowered (see left flower), and almost every variety of double poppy grown.

SINGLE POPPIES, SPECIAL MIXED

In the craze for double flowers, the equally, and often more beautiful, single varieties are neglected. Most of the new offerings of late, however, have been single, and I hope you will take advantage of this splendid mixture, which includes eleven of the newest and best sorts, such as **ADMIRAL**, petals pure white, with broad band of brilliant scarlet; **DAINTY LADY**, rosy mauve, with dark blotches; **DANEBOG**, scarlet with white cross; **TULIP**, brilliant scarlet; **CHARLES DARWIN**, rich dark purple with black velvety spots; **UMBROSUM**, vermilion with black spots; and **MAID OF THE MIST**, white. Some have fringed or fluted petals, and all are more or less cup-shaped. Pkt., 400 seeds, 5c; 2 pkts., 8c; $\frac{1}{2}$ oz., 15c.

POPPIES, SPECIAL MIXED

All my single and double varieties mixed. Pkt., 400 seeds, 4c; 2 pkts., 7c; $\frac{1}{2}$ oz., 10c

GIANT SPIDERPLANT (Cleome Pungens)

Sometimes listed as Electric Light Plant. A tall, bushy annual, each branch crowned with a huge, showy cluster of white, or lilac, flowers, which throw out long stamens curiously like spiders' legs. This is a great improvement on the older sorts, and you should not fail to try it. Use it in clumps, in beds with tall decorative plants, or as a screen. Bees like it and hover about it all day. Blooms from July until frosts. 3 to 5 feet. Pkt., 100 seeds, 5c.

SOLANUM CAPSICASTRUM

"Fra Diavolo"

Or "Jerusalem Cherry." A charming new variety of this old favorite. The plant is more dwarf and compact and will be literally covered with showy bright scarlet berries, which hang on for a long time. Highly decorative and easily grown from seed. Pkt., 50 seeds, 5c.

PYRETHRUM ROSEUM

One of the best hardy perennials with lacy foliage and daisy, or Cosmos-like, flowers in white and various shades of pink and rose. It is hardy anywhere and easily raised from seed. The blossoms come in time for Decoration or Children's Days and are splendid for all cut-flower work. 2 feet. For Pyrethrum plants see p. 50. Pkt., 100 seeds, 5c.

LAWN GRASS SEED

My lawn grass mixture is the one especially recommended by the U. S. Dept. of Agriculture and is the very best that can be made. If directions are followed, it will give a soft close sod of uniform texture and rich emerald green. Allow 1 qt. for 300 sq. ft.; 3 lbs. for 1,200 sq. ft.; 5 bu. per acre.

Directions: To secure the best lawn, the soil should be well drained and deeply plowed, and fertilized with well-rotted manure or some good commercial fertilizer. Harrow or rake it as fine as possible and roll before the seed is sown. Sow as early in the springs as possible, or in September for fall sowing, raking it in lightly to partly cover. For further instructions see my Culture of Flowers, p. 29 (free if asked for with an order of 25c or over).

Lawn Grass, Best Grade. 1 pt., 15c, postpaid; 1 qt., 25c, postpaid; 2 qts., 45c, postpaid; 3 lbs., \$1.15, postpaid; 1 bu., (20 lbs.), \$4.50, by express at buyer's expense. If ordered by freight, add 25c for cartage.

Shady Place Lawn Grass. A mixture especially adapted for sowing under trees and other shady places. 1 pt., 15c; 1 qt., 30c; postpaid; 2 qts., 50c, postpaid; 3 lbs., \$1.25, postpaid.

To Renovate a Poor Lawn Sod. Cut lines six inches apart, and mellow to a depth of three inches. Sow seed and cover lightly with some of the mellow dirt.

SELECT LIST OF BULBS AND PERENNIALS**IMPORTANT NOTICE**

BULB AND PERENNIAL DEPARTMENT. Having made arrangements with one of the largest Peony and Iris nurseries in the United States to furnish the bulbs and plants listed on pp. 46-50, inclusive, I am prepared to give you splendid expert service, better than if I grew the stock myself. They grow over 200 varieties of peonies, and nearly as many sorts of Iris, and if you should desire others not in my list I will make quotations. All sent postpaid.

SEPARATE DEPARTMENT. This includes pp. 46-50 only, and is entirely separate from seed and plant departments. Make out order in a separate list to avoid mistakes. Also do not order less than 15c from this list, as the things are sent separate from seeds and other plants, and cost of postage and packing is more than they come to on 5 and 10-cent orders.

TIME LIMIT. Peonies cannot be sent later than about May 1; Iris, May 15; Phlox, May 10; Miscellaneous Perennials, May 15; Dahlias and Gladioli, June 1. Late orders for these should be in my hands at least five days before the dates given. I am also prepared to make fall delivery of Peonies, Phlox, Iris and the Miscellaneous Perennials mentioned on p. 50.

DELIVERIES. Orders received before April 1st will be placed on file to be sent as soon thereafter as possible. Orders received after April 1st will be attended to in rotation as promptly as possible. Fall deliveries may be made from September till frost, but it is well to set out Iris in the early fall. Orders received too late for spring delivery will be held until fall, unless otherwise requested.

GUARANTY. Only A No. 1 stock, well packed, will be sent, and I guarantee it to reach you in prime condition. If everything is not right please notify me within one week of receipt of goods.

IRIS

THE POOR MAN'S ORCHID

"The Iris is the rainbow personified, a goddess who visits us in garments of indescribable splendor, whose harmonious interweaving of colors is beyond the brush of man." They are an old favorite, but in the great number of new and beautiful colorings one hardly recognizes the old "Plags" of former days. Being exceedingly hardy, requiring such little care, withal so beautiful, they should find a place in every garden.

In the following descriptions the upright, or standard petals, are indicated by "S"; the falls, or drooping petals, by "F."

CLIMBING ROSES

FOUR ROYAL RAMBLER ROSES

Price, 12c each; any 3 for 32c; the 4, one of each for 40c. All are perfectly hardy and unequalled for porch ornamentation.

AGLAI A (Yellow Rambler).—Not so hardy as the others, but it withstands, without protection, a continued temperature of zero, or a little below. Bright lemon yellow.

CRIMSON RAMBLER.—The original Rambler Rose; perfectly hardy everywhere.

PHILADELPHIA RAMBLER.—Pure deep crimson, brighter and more intense than Crimson Rambler. It blooms two weeks earlier and holds its color to the last.

TRIER.—A new yellowish Rambler, perpetual blooming. Flowers are larger than in most Rambler Roses. The color is a soft, creamy white, but the numerous yellow anthers give a decided yellow cast to the flowers. Absolutely hardy.

Two Good Old Climbing Roses

Price, 12c each; the 2 for 20c.

BALTIMORE BELLE. Pale blush, variegated crimson. Flowers very double.

QUEEN OF THE PRAIRIES.—Clear, light red, sometimes with a white stripe; very double and full, blooming in clusters.

CLIMBING AMERICAN BEAUTY

A Sensational Novelty

A splendid new rose. The originator says of it: "Of wonderful beauty and merit. A cross between American Beauty and an unnamed seedling. Color, rosy crimson, identical with its well known parent and with the same exquisite fragrance. Hardy as an oak, of strong habit, making shoots of 10 to 15 feet in a season. Flowers 3 to 4 inches in diameter and borne in great profusion. Blooms throughout the month of June, with occasional flowers during the entire season." Price 15 cents.

TWO NEW HARDY CLIMBING ROSES

Price, 15c each; two for 28c.

ROSE, FLOWER OF FAIRFIELD, or Everblooming Crimson Rambler. It commences to flower in early summer and produces repeated crops of bloom until late fall. It is a sport from Crimson Rambler, is of the same habit and color, though perhaps a shade more brilliant, and has greater resisting power to the sun.

VEILCHENBLAU, or Violet-blue Rose. The most novel of all roses, the result of many years of effort by expert rose growers. It blooms in large clusters, like the Ramblers, is very hardy and not troubled by mildew. Upon first opening the color is a sort of rose, but soon changes to a steel blue, like that of the early violets.

TWO SPLENDID HARDY TEA ROSES

Maman Cochet, pink.

White Maman Cochet.

The two for 22c. postpaid.

EXCELSA (Red Dorothy Perkins)

Planting. German Irises succeed in partial shade, but are at their best in full sun, and will do well in any good garden soil; but the Japanese sorts like moist earth and air.
